My name is Giacomo Jay Ganduglia and I'm a visual artist based in London.
My main work is focused on storyboarding, illustrations and motion design & animation.

I am proficient in Adobe Photoshop and Illustrator, Premiere Pro, Final Cut, After Effects, and Blender.
As a visual artist, I always believed that being a specialist wasn't something for me, I always loved to explore new things, softwares and art styles.

I love mixing different techniques in order to get unique results using both 3d, 2d and real-life (video and still).

Some refer at people like me as generalists, I just love to think no one ever stops learning.
Being curious is the key, being good is great, having fun in the process is the best you can get.
